

Building Safer Learning Environments

A security solution for campuses and districts

A security solution for schools is as critical as pens and books. Students, faculty, visitors, and parents should feel safe and secure within those walls. Recent events have taught us that extra precautions should be taken.

Tyco Cloud offers a cloud-based video surveillance and access control solution that is cost effective and enables real-time alerts that is less obtrusive than guards.

Schools of all sizes, whether it's one campus or a school district look for a solution to monitor their wide spaces. From hallways to playgrounds, **Tyco Cloud** can streamline the video surveillance and access control in a holistic and integrated cloud security system, empowering IT personnel, security staff and administrators to run a safer school.

Monitor School's
wide open spaces

Monitor and
restrict access to
visitors

Prevent violence
and bullying

Save costs by
moving to the
Cloud

Data security
is our priority

Why Schools Choose Tyco Cloud

Cost-savings

- No costs or headaches of on-site servers.
- No more rolling a truck to address server issues.
- Minimal cost of storing video footage in the cloud vs. on-site servers.
- Unlimited users with no license expense or restrictions.

Simple Set up

- Fast deployment – all you need is an internet connection. No NVRs or Servers needed.

Smart Analytics

- You can search through video from up to 100 cameras at the same time in 60 seconds.
- View live door activity and surveillance video from any access point, on one simple interface.

Addressing School Challenges

Wide Area Surveillance

- Manage multiple cameras, locations and users from the Tyco Cloud mobile app.

Old Age Buildings

- Fast installation that requires minimal wiring. Integrate legacy IP cameras to the Cloud.

Financial Constraints

- Flexible monthly or yearly plans that meet your security needs.

Software Training

- Simple, user-friendly browser interface that requires no additional training for IT, personnel, or administrators.

A secure data environment to protect you against cyber attacks

- End-to-end encryption cloud backed by Johnson Controls Cyber Solutions Product Security Program.
- Video recorded is double-redundant and stored within a highly secure Microsoft Azure data centers.
- Data center is regulated by stringent federal security mandates and privacy guidelines.
